Edition 1 · 2026

Start here

Every prompt in this kit is ready to use. Copy it into any AI chat tool, replace the highlighted parts with your own details, and send.

How to fill in a prompt

Write 3 different 2–3 line professional summaries for my resume for a **[job title]** role.

Write 3 different 2–3 line professional summaries for my resume for a **Data Analyst** role.

Five rules for great results

1. **Give real details.** The more you paste about yourself, such as your resume, projects and the job description, the better and more personal the answer.
2. **Keep the conversation going.** The first answer is a draft. Reply with "make it shorter", "more confident" or "give me 3 options". The bonus prompts at the end help.
3. **Never invent experience.** Use AI to present the truth well, not to make things up. Interviewers will ask about everything on your resume.
4. **Protect your privacy.** Don't paste ID numbers (such as Aadhaar, PAN or a Social Security number), bank details, passwords or your phone number into AI tools. Remove them from documents first.
5. **Check the facts.** AI can be confidently wrong. Verify salaries, dates, exam details and company information from official sources.

What's inside

Part 1. Resumes that get shortlisted 1–15

Part 2. Cover letters & applications 16–23

Part 3. LinkedIn & job-site profiles 24–30

Part 7. Studying & exams 58–70

Part 8. Skills & career planning 71–75

Bonus. 10 follow-ups that improve any answer ..... ★

PART 1 · 15 PROMPTS

Resumes that get shortlisted

Build, tailor and polish a one-page resume that gets past screening software and catches a recruiter's eye.

1 Build a resume from scratch

Act as an experienced recruiter in **[country]**. Help me build a one-page resume for a **[job title]** role. Ask me questions one at a time about my education, projects, internships, skills and achievements. When you have enough, write the resume in clear sections: Summary, Education, Skills, Projects, Experience, Achievements.

2 Upgrade weak bullet points

Rewrite these resume bullet points so each one starts with a strong action verb and shows a result. Where a number would help, mark the spot with **[?]** so I can add a real figure. Bullets: **[paste your bullets]**

3 Tailor your resume to a job

Here is a job description and my resume. List the top 10 skills and keywords the employer wants, show which ones my resume is missing, and rewrite my Summary and Skills sections to match, using only things that are true about me. Job description: **[paste]** Resume: **[paste]**

4 Pass the ATS screen

Review my resume for applicant tracking systems (ATS). Point out formatting problems (tables, columns, icons, text in headers), non-standard section names, and keywords I should add for a **[job title]** role. Resume: **[paste]**

5 Write a sharp summary

Write 3 different 2–3 line professional summaries for my resume for a **[job title]** role. My background: **[degree, college, year, key skills, best project or internship]**. Make one formal, one confident and one simple.

6 No experience yet

> I'm a student or recent graduate with no work experience. Help me turn my college projects, coursework, clubs, volunteering and certifications into strong resume content for a **[job title]** role. Here's what I've done: **[list everything, even small things]**

7 Showcase a project

> Turn this project into 3 resume bullet points that show the problem, what I built, the tools I used and the result: **[describe your project]**

8 Organise your skills

> Organise these skills into a resume Skills section with categories (for example Technical, Tools, Languages, Soft skills) for a **[job title]** role. Remove anything weak or irrelevant and tell me why: **[list your skills]**

9 Explain a career gap

> I have a career gap of **[duration]** because **[reason]**. Write one honest, positive line I can add to my resume, and a 2–3 sentence answer I can give if an interviewer asks about it.

10 Switch careers

> I'm moving from **[current field]** to **[target field]**. Identify my transferable skills from the experience below, then rewrite my resume summary and top 5 bullet points to fit the new field: **[paste your experience]**

11 Find hidden achievements

> Ask me 10 questions that will help me uncover achievements I've forgotten to put on my resume, from college, internships, part-time work, family business or volunteering. Ask them one at a time.

12 Proofread like an editor

> Proofread my resume for grammar, spelling, mixed tenses, inconsistent dates and formatting. List each issue with its fix. Don't rewrite anything else. Resume: **[paste]**

13 Cut it to one page

> My resume is too long. Cut it to one page for a **[job title]** role. Tell me what you removed and why. Resume: **[paste]**

14 The 6-second recruiter test

> Act as a busy recruiter who spends 6 seconds on each resume. What do you notice first, what is unclear, and would you shortlist me for `[job title]`? Be honest. Resume: `[paste]`

15 Score your resume

> Score my resume out of 10 for a `[job title]` role at a `[startup / large company / government organisation]` in `[country]`, then list the 5 changes that would raise the score the most. Resume: `[paste]`

PART 2 · 8 PROMPTS

Cover letters & applications

Short, specific messages that get replies, from cover letters to referral requests.

16 Cover letter that stands out

> Write a cover letter for the [job title] role at [company], under 250 words. Use my resume and the job description below. Open with why I'm interested in this specific company, connect 2–3 of my strengths to their needs, and end with a clear next step. Avoid clichés. Resume: [paste] Job description: [paste]

17 Short application email

> Write a short, polite email applying for [job title] at [company] with my resume attached. Include a clear subject line. Keep it under 120 words.

18 Cold email to a hiring manager

> Write a short cold email to [name, role] at [company] asking about [type of role] opportunities. Mention [one specific thing about the company] and one relevant achievement of mine: [achievement]. Under 120 words and not pushy.

19 Ask for a referral

> Write a LinkedIn message asking [name], a [role] at [company] who [studied at my college / I met at an event], for a referral for job ID [ID]. Make it easy for them to say yes and include a 2-line summary of why I fit.

20 Follow up on an application

> Write a polite follow-up email about my application for [job title] at [company], sent on [date]. Keep it brief and add one new reason I'm a good fit: [reason].

21 Internship application

> Write an application for a [type] internship at [company or organisation]. I'm a [year] student of [course] at [college]. Highlight my eagerness to learn, relevant coursework [list] and projects [list].

22 ”Why this company?”

> Help me answer "Why do you want to work at `[company]`?" Here's what I know about them: `[paste from their website or recent news]`. Give me 3 honest, specific answers I can adapt.

23 Track every application

> Create a simple table to track my job applications with columns for company, role, date applied, where I found it, contact person, status, follow-up date and notes. Add 3 example rows.

PART 3 · 7 PROMPTS

LinkedIn & job-site profiles

Make recruiters find you, and like what they see when they do.

24 Headline that gets clicks

Write 5 LinkedIn headline options (under 220 characters) for a **[student / recent graduate / professional]** targeting **[job title]** roles. My key skills: **[list]**.

25 About section

Write a LinkedIn About section in the first person, 150–200 words, friendly but professional. Cover who I am, what I'm good at, what I've done and the roles I'm looking for. Details: **[paste]**

26 Job-site profile summary

Write a profile summary for **[Indeed / Naukri / Seek / another job site]** with the keywords recruiters search for when hiring a **[job title]**. Keep it under 1,000 characters. Background: **[paste]**

27 Experience entries

Turn these resume bullet points into LinkedIn Experience entries that are slightly more conversational and include the skills recruiters search for: **[paste]**

28 Your first post

Write a LinkedIn post announcing **[that I finished my degree / earned a certification / built a project / am open to work]**. Keep it genuine, under 150 words, with 3 relevant hashtags. Details: **[paste]**

29 Connection request notes

Write 5 short LinkedIn connection notes (under 200 characters each) for: a recruiter, a senior from my college, someone at a company I admire, a speaker I heard, and someone already in my target role.

30 Profile makeover

> Review my LinkedIn profile as a recruiter hiring for **[job title]**. What's missing, what's weak, and what should I change first? Headline: **[paste]** About: **[paste]** Experience: **[paste]**

PART 4 · 7 PROMPTS

Job search strategy

Search smarter: the right roles, a realistic plan, and protection from scams.

31 Discover roles that fit you

> Based on my degree [degree], skills [list] and interests [list], suggest 10 job titles I could apply for in [country]. For each, explain what the job involves day to day and the usual entry-level requirements.

32 Decode a job description

> Explain this job description in simple words: what I'd actually do each day, must-have versus nice-to-have skills, and any red flags I should ask about. Job description: [paste]

33 4-week job search plan

> Create a 4-week job search plan for an [entry-level / experienced] candidate targeting [job title] roles in [city / remote]. I can spend [hours] a day. Include daily targets for applications, networking and skill-building.

34 Where to look

> What kinds of companies in [country] hire entry-level [job title]s? Group them into startups, mid-size companies, large multinationals and government or public-sector roles, and tell me where each type usually posts openings.

35 Spot a fake job

> Here is a job offer or message I received. Check it for signs of a scam, such as asking for fees, unrealistic pay, requests for personal documents, unofficial email addresses or pressure to decide fast. Tell me what to verify before replying: [paste the message]

36 Why am I not getting calls?

> I applied to [number] jobs for [job title] and got [results, e.g. no replies / only rejections]. Here is my resume: [paste]. What are the most likely reasons, and what should I fix first?

37 Earn while you search

> Suggest 10 ways I can earn money or gain experience with my skills **[list]** while I look for a job, such as freelancing, internships, projects or part-time work, and how to find each one.

PART 5 · 15 PROMPTS

Interview preparation

Practise with an AI interviewer until the real one feels easy.

38 Full mock interview

> Act as an interviewer for a **[job title]** role at a **[type of company]**. Ask me one question at a time, mixing HR, technical and situational questions. After each answer, rate it out of 10 and tell me how to improve it. Stop after 10 questions and give overall feedback.

39 ”Tell me about yourself”

> Write a 60–90 second answer to "Tell me about yourself" for a **[job title]** interview, using a present–past–future structure. My background: **[paste]**. Then give me a shorter 30-second version.

40 Strengths & weaknesses

> Help me answer "What are your strengths and weaknesses?" honestly for a **[job title]** role. My real strengths: **[list]**. Something I'm genuinely working on: **[weakness]**. Show how I'm improving it.

41 Build STAR stories

> Turn this experience into a STAR (Situation, Task, Action, Result) answer that takes under 2 minutes to say, for questions about **[teamwork / leadership / pressure / conflict]**: **[describe what happened]**

42 Predict the questions

> List the 20 questions I'm most likely to be asked in an interview for **[job title]** at **[company]**, based on this job description. Group them into HR, technical and role-specific questions. Job description: **[paste]**

43 Technical quiz

> Quiz me on **[topic, e.g. SQL joins / Java OOP / Excel / accounting basics]**. Ask one question at a time, from easy to hard. If I get one wrong, explain the right answer simply before moving on.

44 Defend your project

I'll be asked about my project: [describe it]. Ask me the 10 toughest questions an interviewer could ask about it, one at a time, and help me improve each of my answers.

45 "Why should we hire you?"

Write 3 versions of an answer to "Why should we hire you?" for a [job title] role, based on my strengths [list] and what the job needs [paste key requirements].

46 Questions to ask them

Give me 10 smart questions to ask at the end of a [job title] interview at a [startup / MNC / government] organisation, and explain what each one helps me learn.

47 Group discussion prep

I have a group discussion on [topic]. Give me the key points for and against, 3 strong opening lines, facts I should double-check, and tips for contributing without dominating.

48 Tricky HR questions

Help me answer these honestly and positively: Why did you choose this field? Where do you see yourself in 5 years? Are you willing to relocate? Why the [gap / low marks / change of field]? My situation: [details]

49 Spoken English practice

Help me practise speaking for interviews. Ask me a common interview question. I'll type my answer the way I'd say it. Then correct my grammar, suggest more natural phrasing, and show me a polished version. Repeat with a new question.

50 Interview-day checklist

Create a checklist for the day before and the morning of my [online / in-person] interview for [job title] at [company]: research, documents, outfit, tech check and what to revise.

51 Thank-you email

Write a short thank-you email to [interviewer's name] after today's interview for [job title]. Mention [something we discussed] and restate my interest. Under 100 words.

52 Bounce back from a rejection

> I wasn't selected for `[job title]` at `[company]`. Write a polite reply asking for brief feedback and to be considered for future roles. Then give me 3 questions to reflect on before my next interview.

PART 6 · 5 PROMPTS

Salary, offers & your first job

Understand what you're offered, ask for what you're worth, and start strong.

53 Research a fair salary

What is a realistic salary range for a **[job title]** **[entry-level / with X years' experience]** in **[city, country]**? Explain what affects it, and tell me which sources I should check to confirm it.

54 Negotiate politely

I received an offer of **[amount]** for **[job title]**. I was hoping for **[amount]** because **[reasons]**. Write a polite email and a short phone script to negotiate, and tell me what else I could ask for if the salary is fixed.

55 Understand your offer letter

Explain this offer letter in simple terms: gross versus take-home pay (CTC versus in-hand, if you are in India), bonuses, any bond or notice period, probation, and anything I should question before signing: **[paste, with personal details removed]**

56 Compare two offers

Help me compare two job offers. Offer A: **[details]**. Offer B: **[details]**. Make a table covering pay, growth, learning, location, work-life balance and stability, then ask me 3 questions to help me decide.

57 Your first 90 days

I'm starting as a **[job title]** at a **[type of company]**. Create a 30-60-90 day plan to make a good impression, learn fast and build good relationships.

PART 7 · 13 PROMPTS

Studying & exams

Learn faster, revise smarter and walk into the exam hall prepared.

58 Explain it simply

> Explain [topic] like I'm a complete beginner, using a simple everyday example. Then explain it again at exam level, using the key terms I should write in my answers.

59 Personal study plan

> Create a day-by-day study plan for my [exam] on [date]. Subjects and chapters: [list]. I can study [hours] a day. Put my weak areas first ([list]) and include revision days and practice tests.

60 Quiz me

> Quiz me on [chapter or topic] with 10 questions, mixing multiple-choice and short answers. Wait for my answers, then mark them and explain any mistakes.

61 Notes from any text

> Turn this text into concise revision notes with headings, bullet points, key definitions and formulas, plus 5 likely exam questions: [paste text]

62 Flashcards in seconds

> Create 20 flashcards for [topic] as a two-column table (question, answer) that I can copy into Anki or Quizlet.

63 Crack previous papers

> Here are questions from previous [exam] papers: [paste]. Find the most repeated topics and patterns, and tell me where to focus my preparation.

64 Write full-mark answers

> Show me how to write a [marks]-mark answer to this question: the ideal structure, the key points to include, and where a diagram would help: [question]

65 Solve step by step

> Solve this problem step by step and explain why each step works. Then give me a similar problem to try on my own: **[paste problem]**

66 Memory tricks

> Create memory tricks (mnemonics, short stories or associations) to help me remember: **[list, sequence or facts]**

67 Current affairs to exam notes

> Turn this news article into exam notes: the key facts, why it matters, and 3 questions that could be asked about it in **[your exam, e.g. civil service, UPSC, SAT, GRE or a professional exam]**: **[paste article]**

68 Feedback, not a rewrite

> Give feedback on my **[essay / assignment]** about **[topic]**: structure, argument, clarity and grammar. Don't rewrite it for me. Tell me what to improve and why: **[paste]**

69 Map a whole chapter

> Break **[subject or chapter]** into a concept map: the main ideas, the sub-topics, and how they connect. Show it as an indented outline.

70 Beat distraction and stress

> I get distracted and stressed while studying. Suggest a realistic daily routine for exam season, covering focus techniques like Pomodoro, breaks, sleep and phone rules, for someone studying **[hours]** a day.

PART 8 · 5 PROMPTS

Skills & career planning

Know what to learn next, and prove it with work recruiters can see.

71 Find your skill gaps

I want to become a **[job title]**. My current skills: **[list]**. Show the skills I'm missing, ranked by importance, with a free or low-cost way to learn each one.

72 3-month learning roadmap

Create a 3-month roadmap to become job-ready as a **[job title]**, with weekly goals, the kinds of free resources to look for, and 3 portfolio projects to build along the way.

73 Portfolio project ideas

Suggest 5 portfolio projects for a **[job title]** that would impress recruiters in **[country]**, with the difficulty level, tools needed and what each project proves about me.

74 Higher studies or a job?

Help me decide between **[option A, e.g. MBA / MTech / a job / government exam preparation]** and **[option B]**. First ask me about my goals, finances and interests, then give me a balanced comparison.

75 Certifications worth it

Which certifications actually help for **[job title]** roles in **[country]**? Separate free from paid, and tell me which ones recruiters value versus which are only nice to have.

BONUS · 10 FOLLOW-UPS

Make any answer better

Send one of these after any answer to sharpen it.

Ask me first

> Before you answer, ask me any questions you need to give me a better result.

Make it sound like me

> Rewrite this so it sounds like me. Here is something I wrote: **[paste a sample]**

Shorter and simpler

> Make this 50% shorter and use simple words.

Give me options

> Give me 3 different versions so I can choose.

What's missing?

> What is missing or weak in this? Be honest.

Check yourself

> Review your answer for mistakes or anything you may have made up, and correct it.

Make it a table

> Turn this into a table I can copy.

Natural workplace English

> Rewrite this in clear, simple English that sounds natural in a workplace in **[country]**.

Translate it

> Translate this into `[Spanish / Hindi / Arabic / your language]`, keeping it natural and easy to read.

Explain your choices

> Explain why you made these changes so I can do it myself next time.

You’ve got this.
